

**LK-1900S**Computer-controlled, High-speed, Bartacking Machine

# Good Value Models with JUKI Quality and Friendly to Operators

Computer-controlled, High-speed, Bartacking Machine

LK-19005

JUKI ECO PRODUCTS

The LK-1900S is an eco-friendly product which complies with JUKI ECO PRODUCTS standards for protecting the environment.

The sewing machine complies with the "Juki Group Green Procurement Guidelines" on the use of hazardous substances,

which is stricter than other restrictions, such as those of the RoHS Directive.

For details of JUKI ECO PRODUCTS, refer to: http://www.juki.co.jp/eco\_e/index.html

Registered Organization: JUKI CORPORATION Head Office The Scope of the Registration: The activities of research development, design, sales, distribution, and maintenanc services of industrial sewing machines, household sewin machines and industrial robots, etc., including sales an

## **LK-1900S**

Computer-controlled, High-speed, Bartacking Machine

JUKI Simple Series sewing machine LK-1900S has been designed to have simplified and narrowed down capabilities that are essentially required to produce JUKI's established seam quality. In addition, it supports the operator with the voice guidance system to improve work efficiency.

## JUKI's established quality is achieved with simplified functions

## **Higher productivity**

This sewing machine shortens the total cycle time with its improved capabilities such as the maximum sewing speed of 3,200 sti/min, quick acceleration at the beginning of sewing and quick deceleration at the end of sewing, increased thread trimming speed and work clamp foot lifting speed.

## **Higher flexibility**

- This sewing machine quickly carries out sewing of various kinds of sewing patterns.
- The sewing machine is provided as standard with 51 sewing patterns with different stitch directions and number of stitches, such as large bartacking, small bartacking, straight line tacking. The operator can select the best-suited sewing pattern according to the given process. (In some cases, the work clamp foot and other parts may be required to be changed.)
- The sewing machine provides the sewing area of 30 mm (length) × 40 mm (width).

  With its large sewing area, this sewing machine can be fully utilized for sewing various kinds of sewing
- In addition, the sewing machine has such a large memory capacity to store many different scale ratios, numbers of stitches and numbers of sewing patterns, thereby ensuring improved flexibility.
- Feed control systems

The Y-θ intermittent feed system that JUKI has developed for many years has been adopted for the feed control of the LK-1900S.

- The LK-1900S comes in two different types to allow customers to select the best-suited one.
- The LK-1900S comes in two different types; i.e., S type (Standard) and H type (for Heavy-weight materials). Customers may select one of these types according to their applications.

patterns such as lengthwise bartacking.

 The sewing machine has adopted a sufficient-in-power 550-W motor. With this motor, the sewing machine allows the needle to penetrate into heavy-weight materials smoothly.

LK-1900S-S type (Bartacking pocket lip of suits)

LK-1900S-H type (Bartacking crotch of jeans)

### Standard operation panel (new model)

#### ■ Voice guidance for the operator

This sewing machine is provided as standard with the voice-guidance system with clock function.

This voice guidance can be used for the purpose of production support such as giving the operator information about the number of pieces produced, work progress management and the operation rate of sewing machine, though the initial setting is required.

- Bartacking data contained in a pattern number can be changed with ease by means of the pattern enlargement / reduction function. This operation can be done by entering the scale ratio through the operation panel.
- Standard sewing patterns can be registered to the pattern keys P1 to P50. In addition, the registered patterns P1 through P25 can be called up by a touch of the corresponding pattern key. It is advised to register 25 sewing patterns you use frequently to the pattern keys P1 to P 25 in order to improve workability.
- The operation panel is provided as standard with a USB port. This means that the sewing machine data management and software updating can be carried out with ease by means of the USB port.

## Improved operability

■ Longer distance from machine arm to needle ensures comfortable work

The slim-in-shape machine head has been designed to provide a longer distance from machine arm to needle to improve ease of handling the material and of carrying out continuous work. Location of the hand pulley allows the operator to check the needle entry with ease

The hand pulley is located at the arm of machine head. This arrangement helps the operator visually check the needle entry with page

#### ■ Excellent responsiveness promises comfortable work

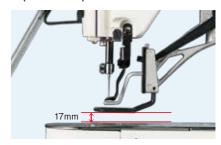

The direct-drive system that directly connects the compact AC servomotor to the main shaft of the sewing machine has been adopted. This system enables quick startup and promises increased stopping accuracy, thereby contributing to improved responsiveness.

## ■ LED light (light quantity in five levels + light-out function)

The LED light that illuminates the needle entry area is provided as standard. The LED light is provided with the six-step changeover switch to control its brightness and light-out.

## ■ Work clamp foot lifting height (max. 17mm)

The sewing machine is provided as standard with the stepping-motor type work clamp foot lifting device. The maximum lifting amount of the work clamp foot is 17 mm.

#### **SPECIFICATIONS**

Model name	LK-1900S-SS	LK-1900S-HS			
Application	Standard	For heavy-weight materials			
Lubrication	Semi-dry head (Hook : minute-quantity lubrication)				
Max. sewing speed	3,200sti/min* (at the time	of delivery : 2,700sti/min*)			
Sewing area	30mm (L) ×	40mm (W)			
Stitch length	0.1~10mm((	0.1mm step)			
Needle bar stroke	41.2	2mm			
Lift of the work clamp foot	Standard 13mm (17mm when the re	everse-rotation needle-up function)			
Auto-lifter	Provided as standard	(stepping motor type)			
Needle thread tension	Spring type dial thread tension controller				
Needle (at the time of delivery)	DP×5(#14)	DP×17(#21)			
Hook	Standard shuttle hook				
Number of stitches that can be stored in memory	Max. 20,000 stitches				
Number of standard patterns	51 patterns				
Number of data that can be input	200 patterns				
Enlarging / Reducing facility	20~200% (1% step), Pattern enlargement / reduction can be done by increasing / decreasing the stitch length				
Memory medium	Internal-organs memory				
Bobbin thread counter	Provided as standard (up / down method)				
Lubricating oil	JUKI New Defrix Oil No.2 (equivalent to ISO VG32)				
Sewing machine motor	Compact AC servomotor (direct-drive system)				
Power supply / Power consumption	Single-phase 200~240V / 250VA				
Weight	Machine head (include motor) 42kg, Control box 5.1kg				

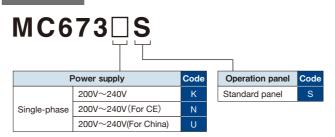

<sup>\* &</sup>quot;sti/min" stands for "Stiches per Minute"

#### ■ WHEN YOU PLACE ORDERS

Please note when placing orders, that the model name should be written as follows:
